

**AMENDMENTS TO THE SPECIFICATION**

Please replace Paragraph [0023] with the following paragraph rewritten in amendment format:

[0023] As best shown in FIGS. 4, 5, and 6, the carrier 10 has a top surface 12 and an opposite surface 18. Carrier 10 may be generally flat and top surface 12 and opposite surface 18 may generally be in the form of planar surfaces. Preferably, a first pair of stopper members 20 are formed or molded of a polymeric material onto the top surface 12. The pair of stopper members 20 consists of two spaced apart relatively flat compression limiters or stops 22, 24, respectively. In between the stops 22, 24, respectively is a first void or first cavity 36. The cavity 36 that is formed between the two stops 22, 24 is a volumetric space (a width, a height and a length), as is well known in the art.
